

Parking management renaissance in Slovenia

Webinar, January 2026

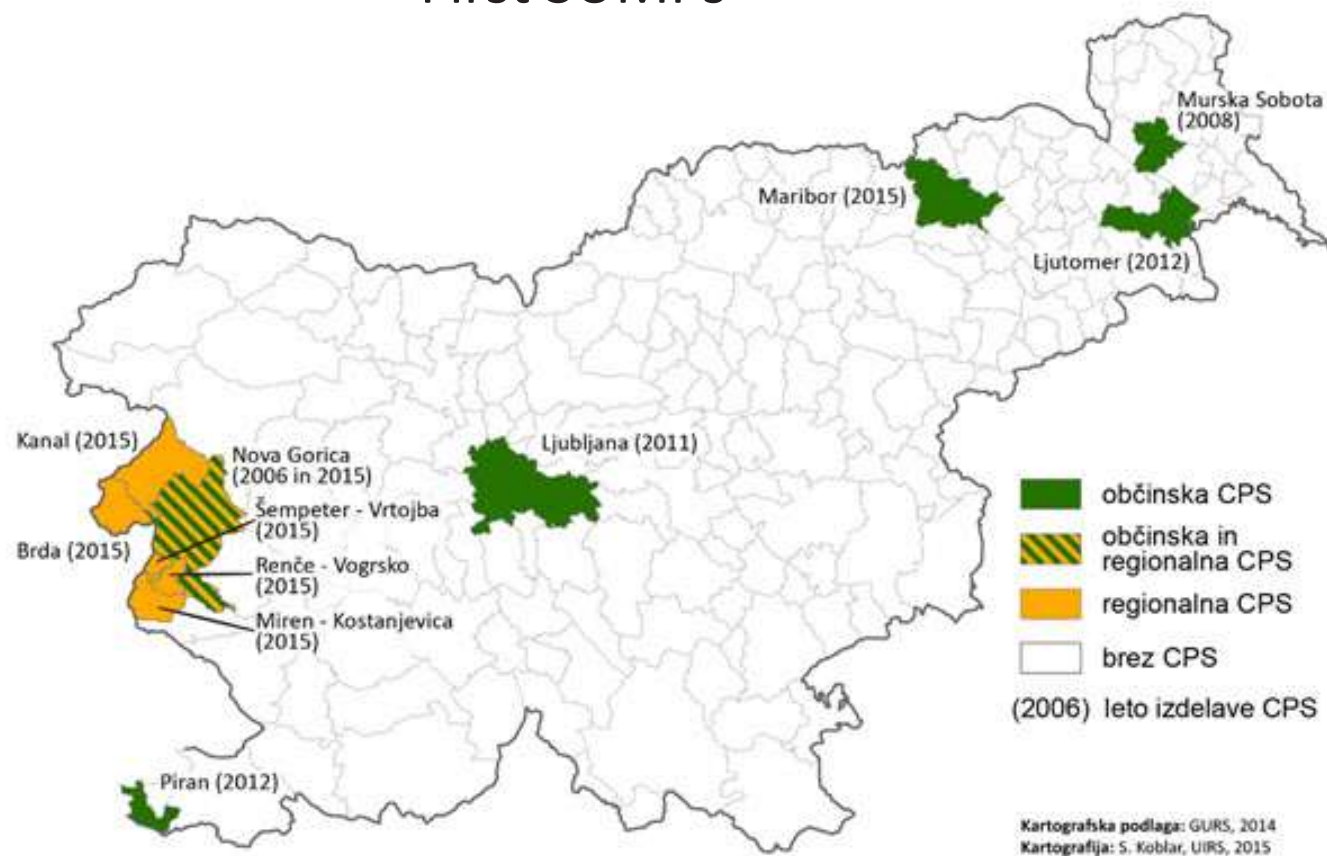

Andraž Hudoklin

Urbanistični inštitut Republike Slovenije, Skupina za transformativno prometno načrtovanje

Parking management in the first SUMP

- First SUMP as opportunities for parking management

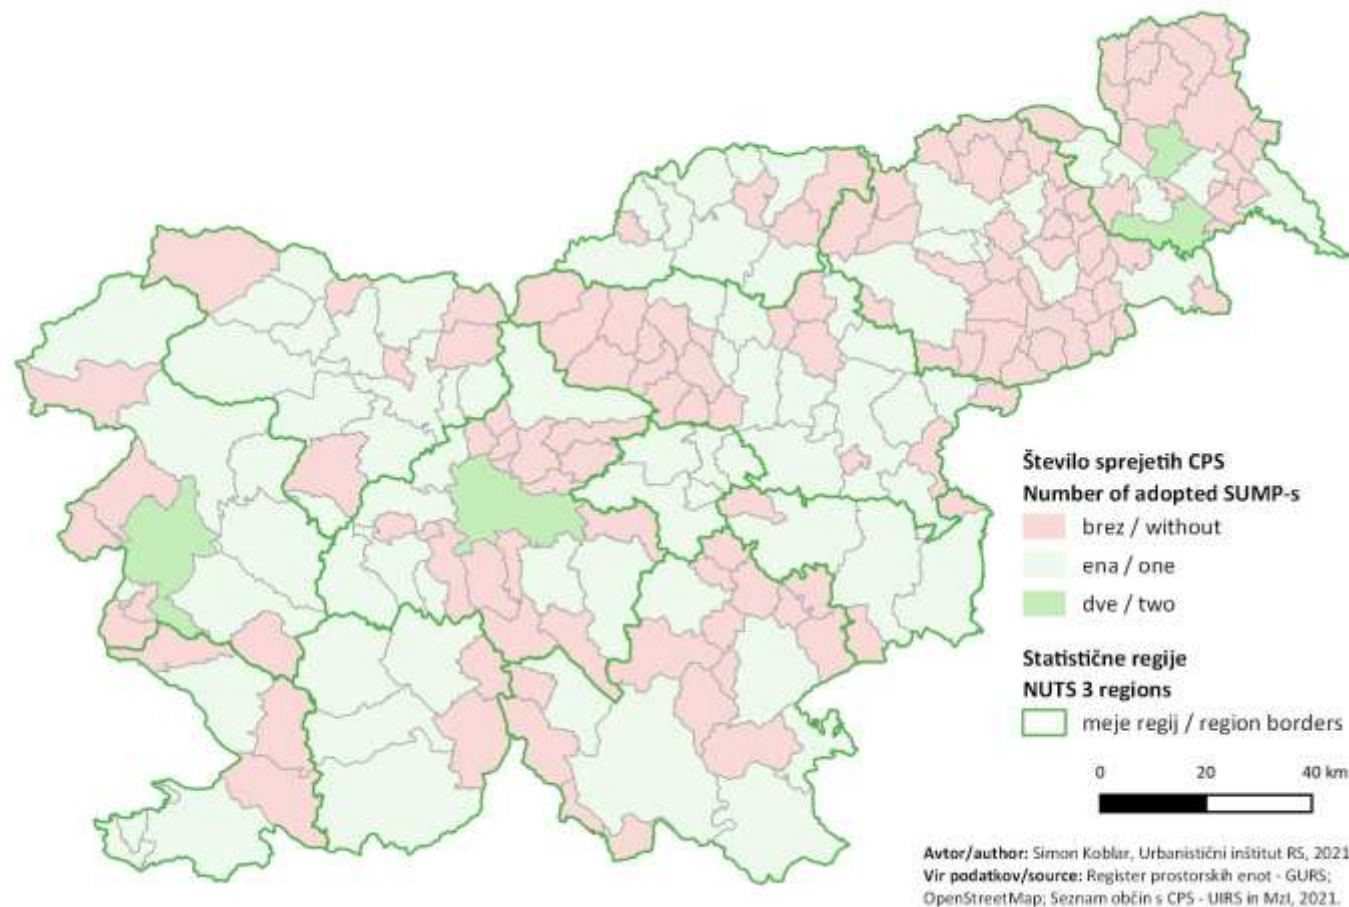

First SUMP

Parking management in the first SUMP-s

- First SUMP-s as opportunities for parking management

SUMP in 2021

Parking management projects

- Long tradition of parking management projects on EU level.
- **EU projects** play a key role in facilitating knowledge transfer and capacity building within Slovenia.
 - PUSH&PULL, 2014 -2017
 - Park4SUMP, 2018 (2021) - 2022
 - NXTLVL Parking, 2022 – 2026 (ongoing)
- **National projects** by Slovenian ministries
 - Parking management and spatial planning project (Mirujoči promet, 2017)
 - Sustainable Mobility Education, 2020 - 2023
 - Sustainable parking policy project, 2023
 - Project on short-distance cities (Udobna mesta, 2021)

National guidelines for improving local parking policy.

- Published in 2022.
- Based on  PARKPAD PARKING POLICY AUDIT
- ParkPAD = *Parking Policy Audit* for cities or municipalities.
- Published by MZI, prepared by UIRS in the project *Sustainable mobility education*.

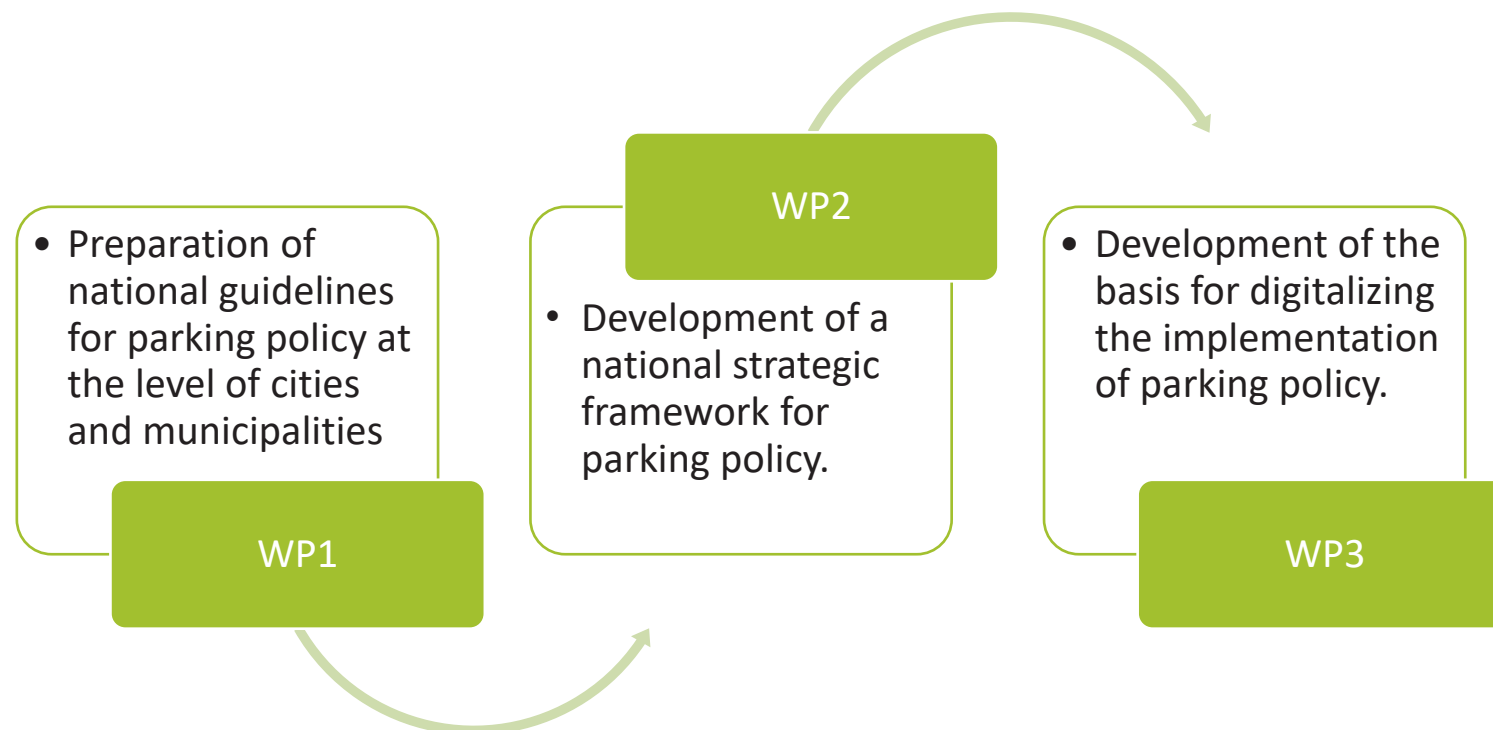

Comprehensive transport planning law

- Adopted in 2022.
- Regulates parking policy (Articles 24 and 25).
- No regional authorities.
- 12 bigger (city) municipalities obliged to prepare an Action plan for their parking policy by 2028.

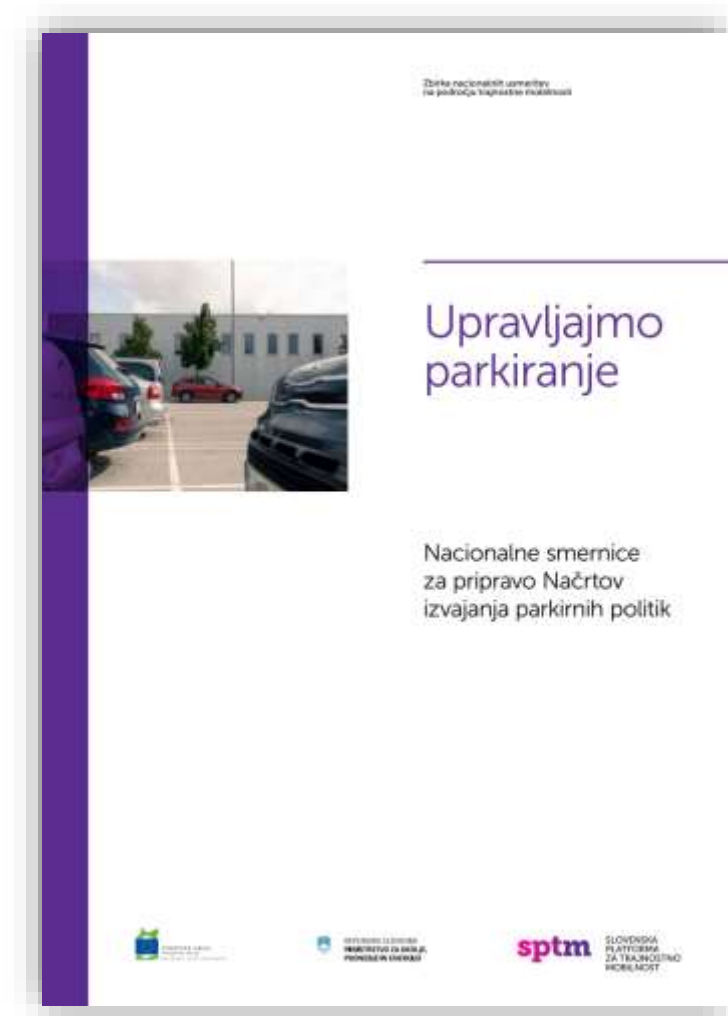

Sustainable parking policy project

- National project launched by MOPE (Ministry of the Environment, Climate and Energy) in 2023.
- Several partners for each WP.
- Three main work packages:

Sustainable parking policy project, WP1

- National guidelines for preparation of implementation plans for parking policies.
- Model ordinances for municipal parking management
- Model conditions to put in municipal spatial plans
- Pilot projects in municipalities

Sustainable parking policy project, WP2, Development of a national strategic framework for parking policy.

- Strategic framework for parking management in Slovenia.
- Technical standards for parking area design.
- Parking management in tourist and conservation areas.
- National system of mobility points (P+R).
- National conference on SUMP, topic of parking management.
- International overview of parking management – youtube, scan QR code ->
- Trainings for consultants and municipalities

An international overview of parking management

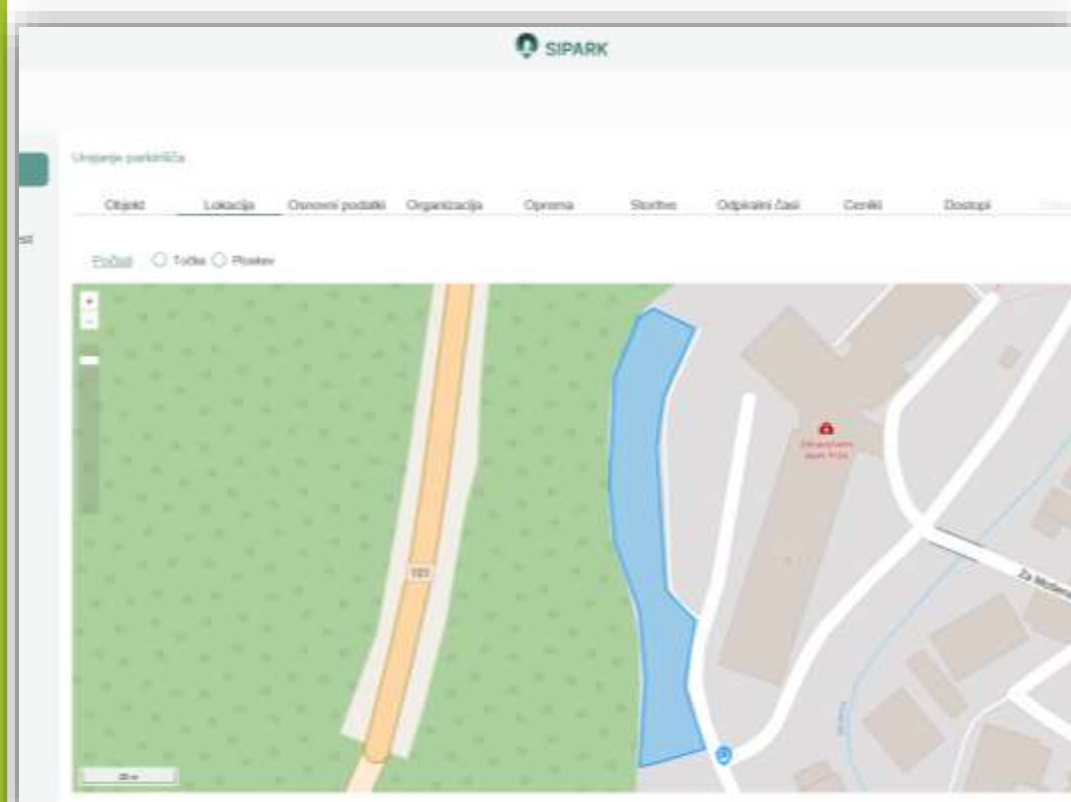

Paul Barter, Martina Hertl, Todd Litman, Giuliano Mingardo, Tom Rye

Sreda, 1. marec 2023

Thermana Laško, Zdraviliška cesta 6, Laško

Sustainable parking policy project, WP3

- WP3: Development of the basis for digitalizing the implementation of parking policy
- National website on parking management SIPARK

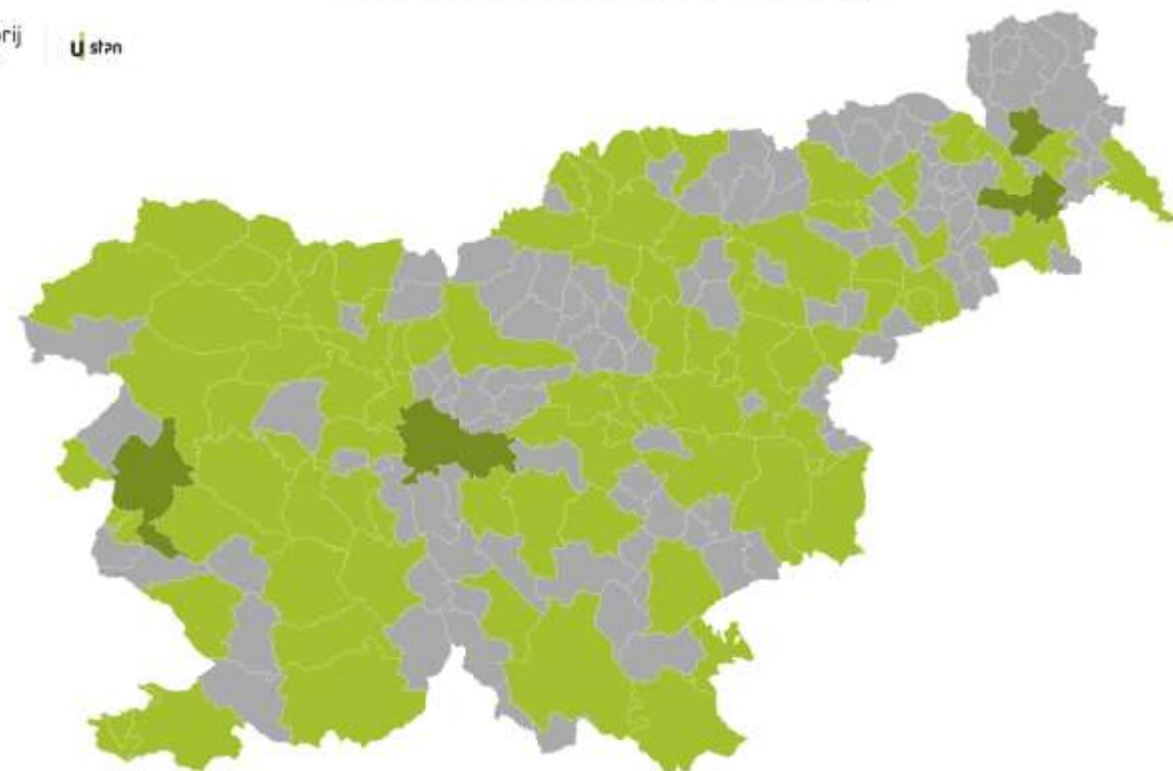

Municipal SUMP

- New generation in 2025, 180 municipal SUMP
- Municipal SUMP must cover parking management.

SUMPs in 2025

Občinske celostne prometne strategije

©2024 - 2026 Skupina za transformativno prometno načrtovanje Urbanistični inštitut Republike Slovenije

Next steps?

- Learning from SUMP processes
- Regional SUMPs
- Learning and bringing knowledge from EU parking projects
- Recommendations for SI ministry
 - Monitoring and evaluation
- National elections – uncertainty.

Hvala
