Sustainable Urban Design : Citizen Participation : Smart Technologies : Transport Planning : Resilient Infrastructure

The Challenge: *Living street – street as a place for all*

Reclaiming the street for public – focusing on different users

Space for interactions, active leisure and greenery

Increasing community resilience and preparing public space for climate crisis

Site location

Šibenik, Croatia

Site no. 1 – Riva

Current situation/problems
limited seating area
narrow space
for pedestrians
no clear views

Solutions
shared street
multiple seating areas with an
unobstructed view of the sea

Site no. 2 – Put Gimnazije

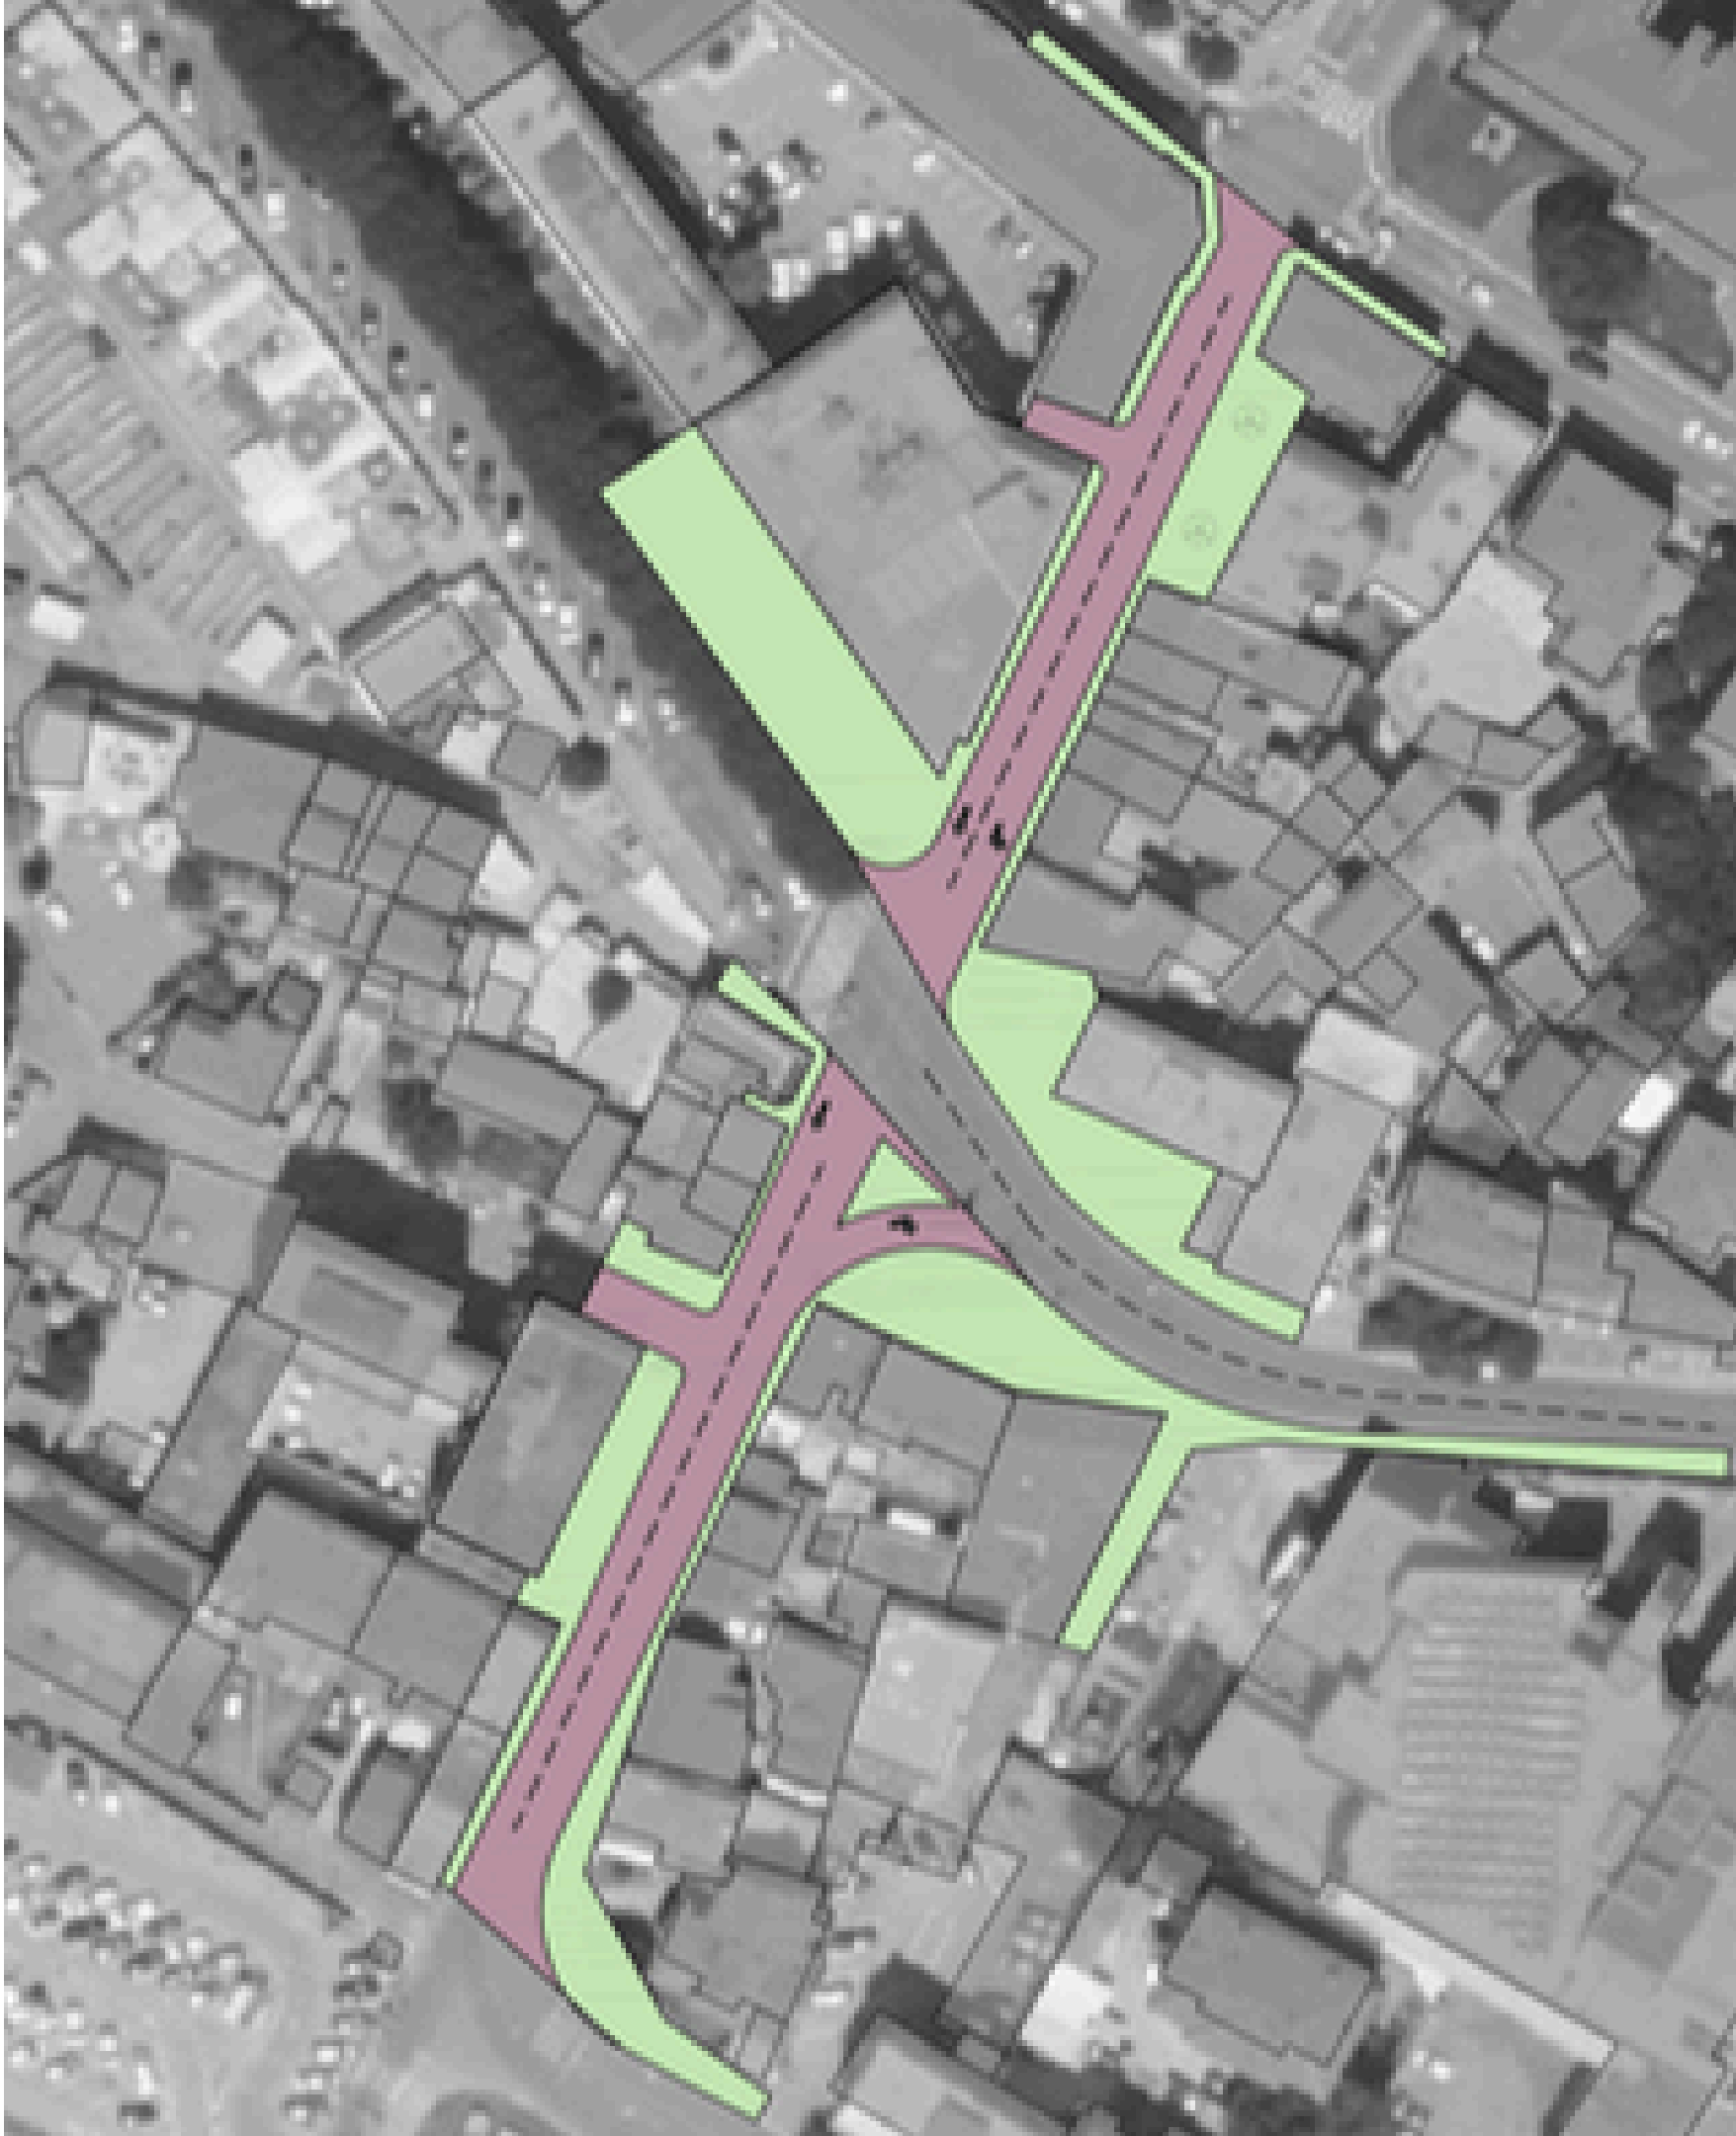

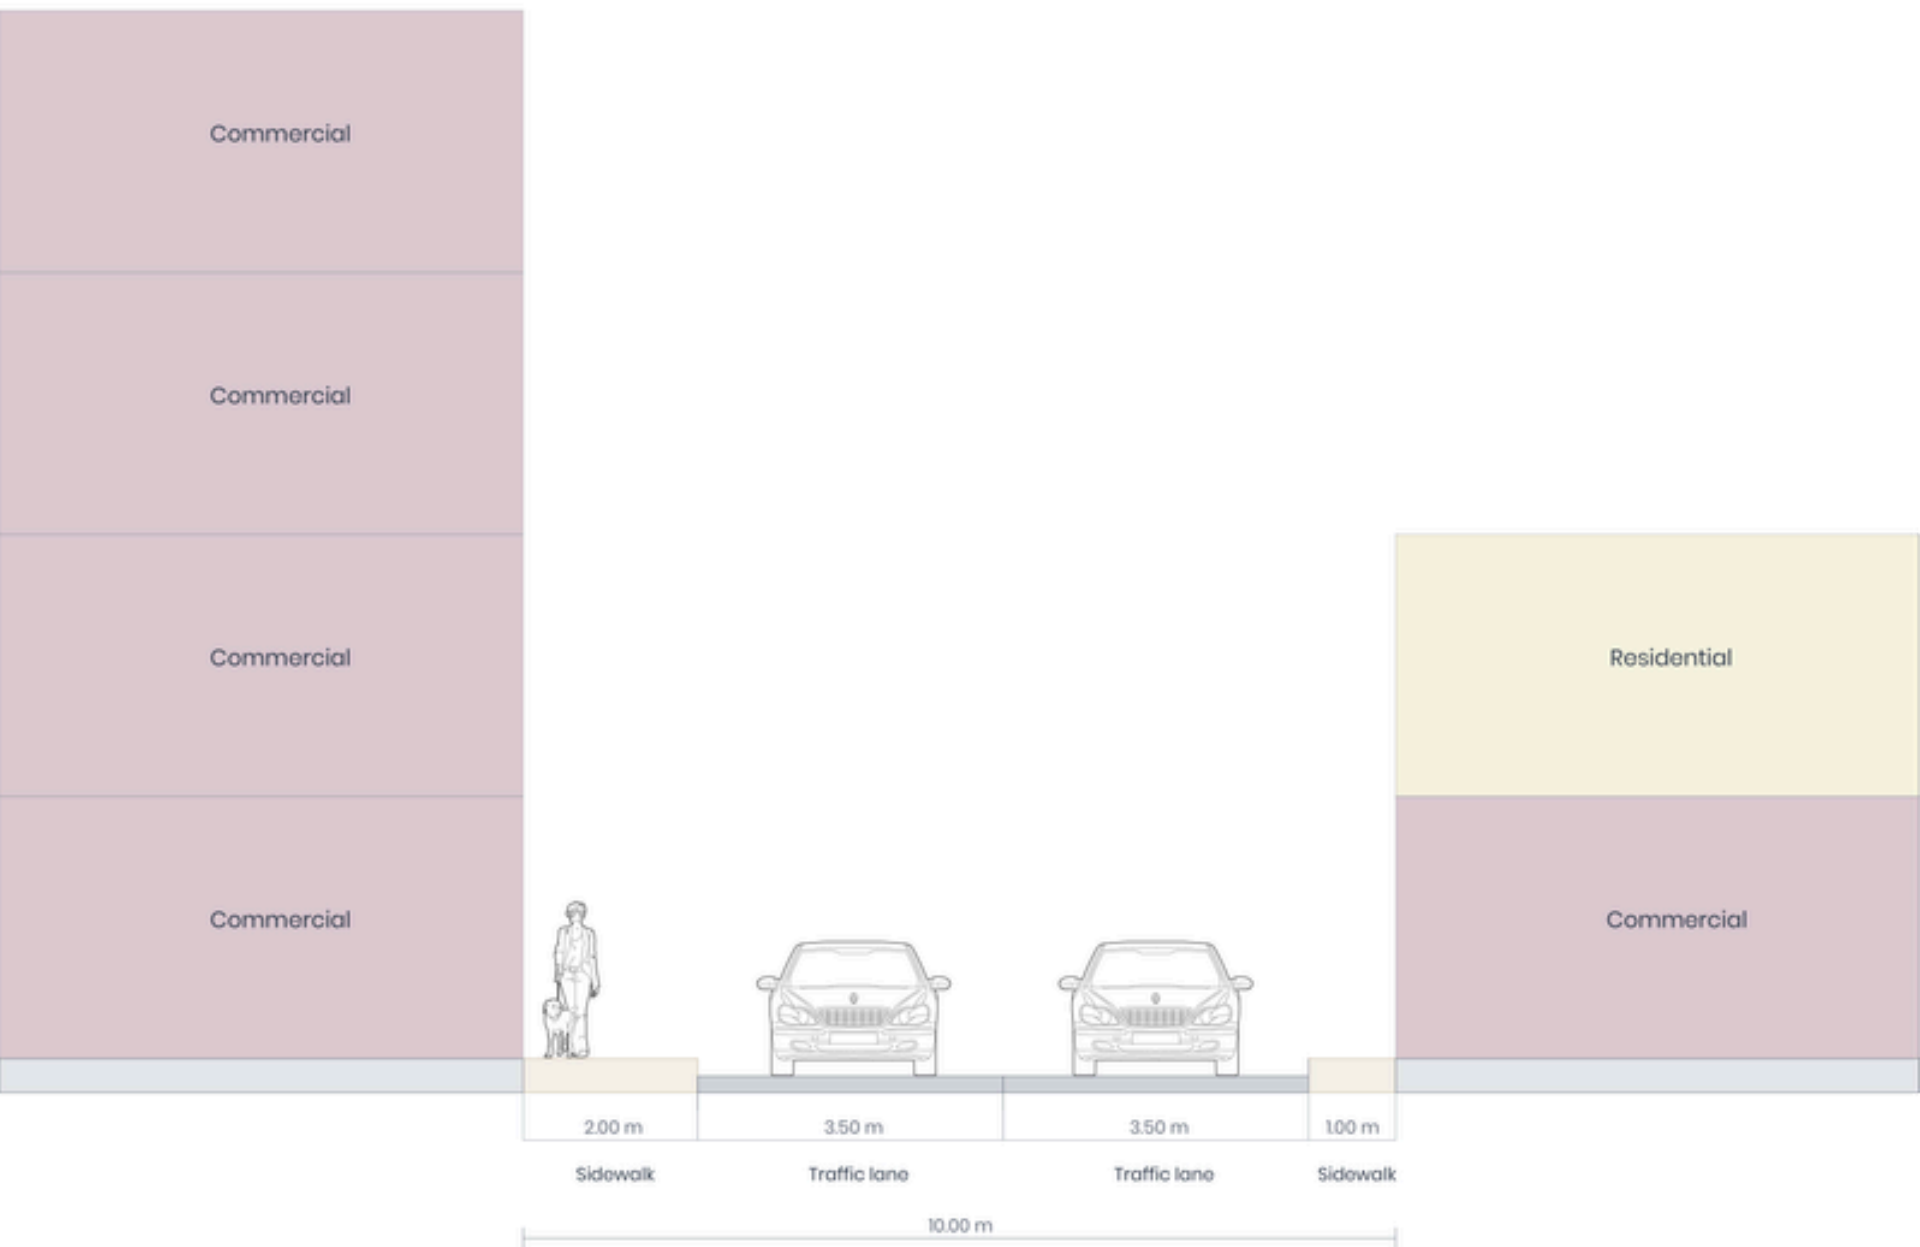

Current situation/problems
no seating area
need for more greenery

Solutions
pots with plants
seating areas

Site no. 3

fra. Jerolima Milete

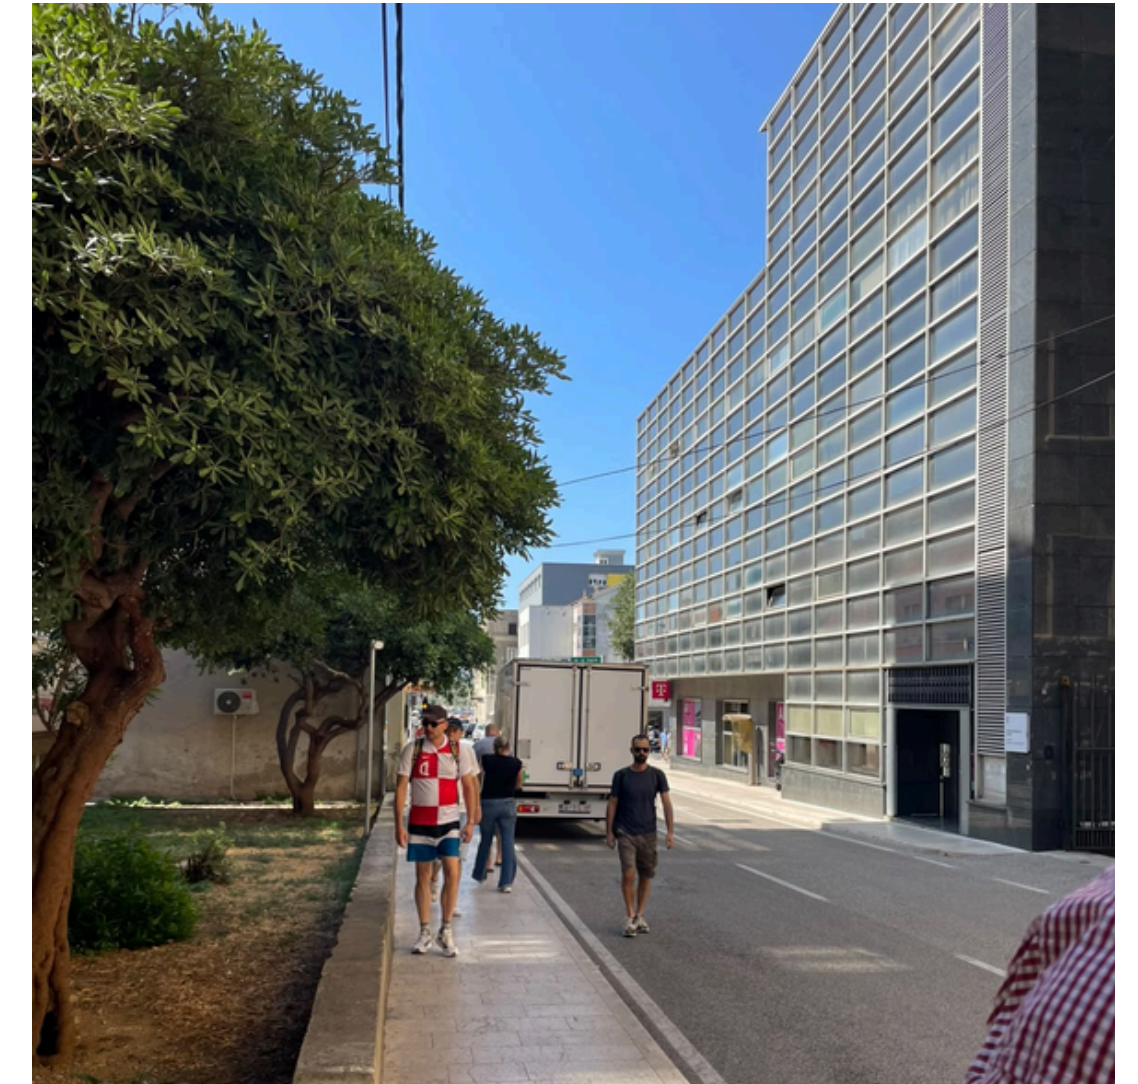

Problems^o

St. fra. Jerolima Milete

Two-lane road.
But one-way.

Narrow sidewalks.

Lack of seating.

Poor lighting.

**Pedestrian-unfriendly
crossing.**

High-speed turning lane.

No trash bins.

User stories

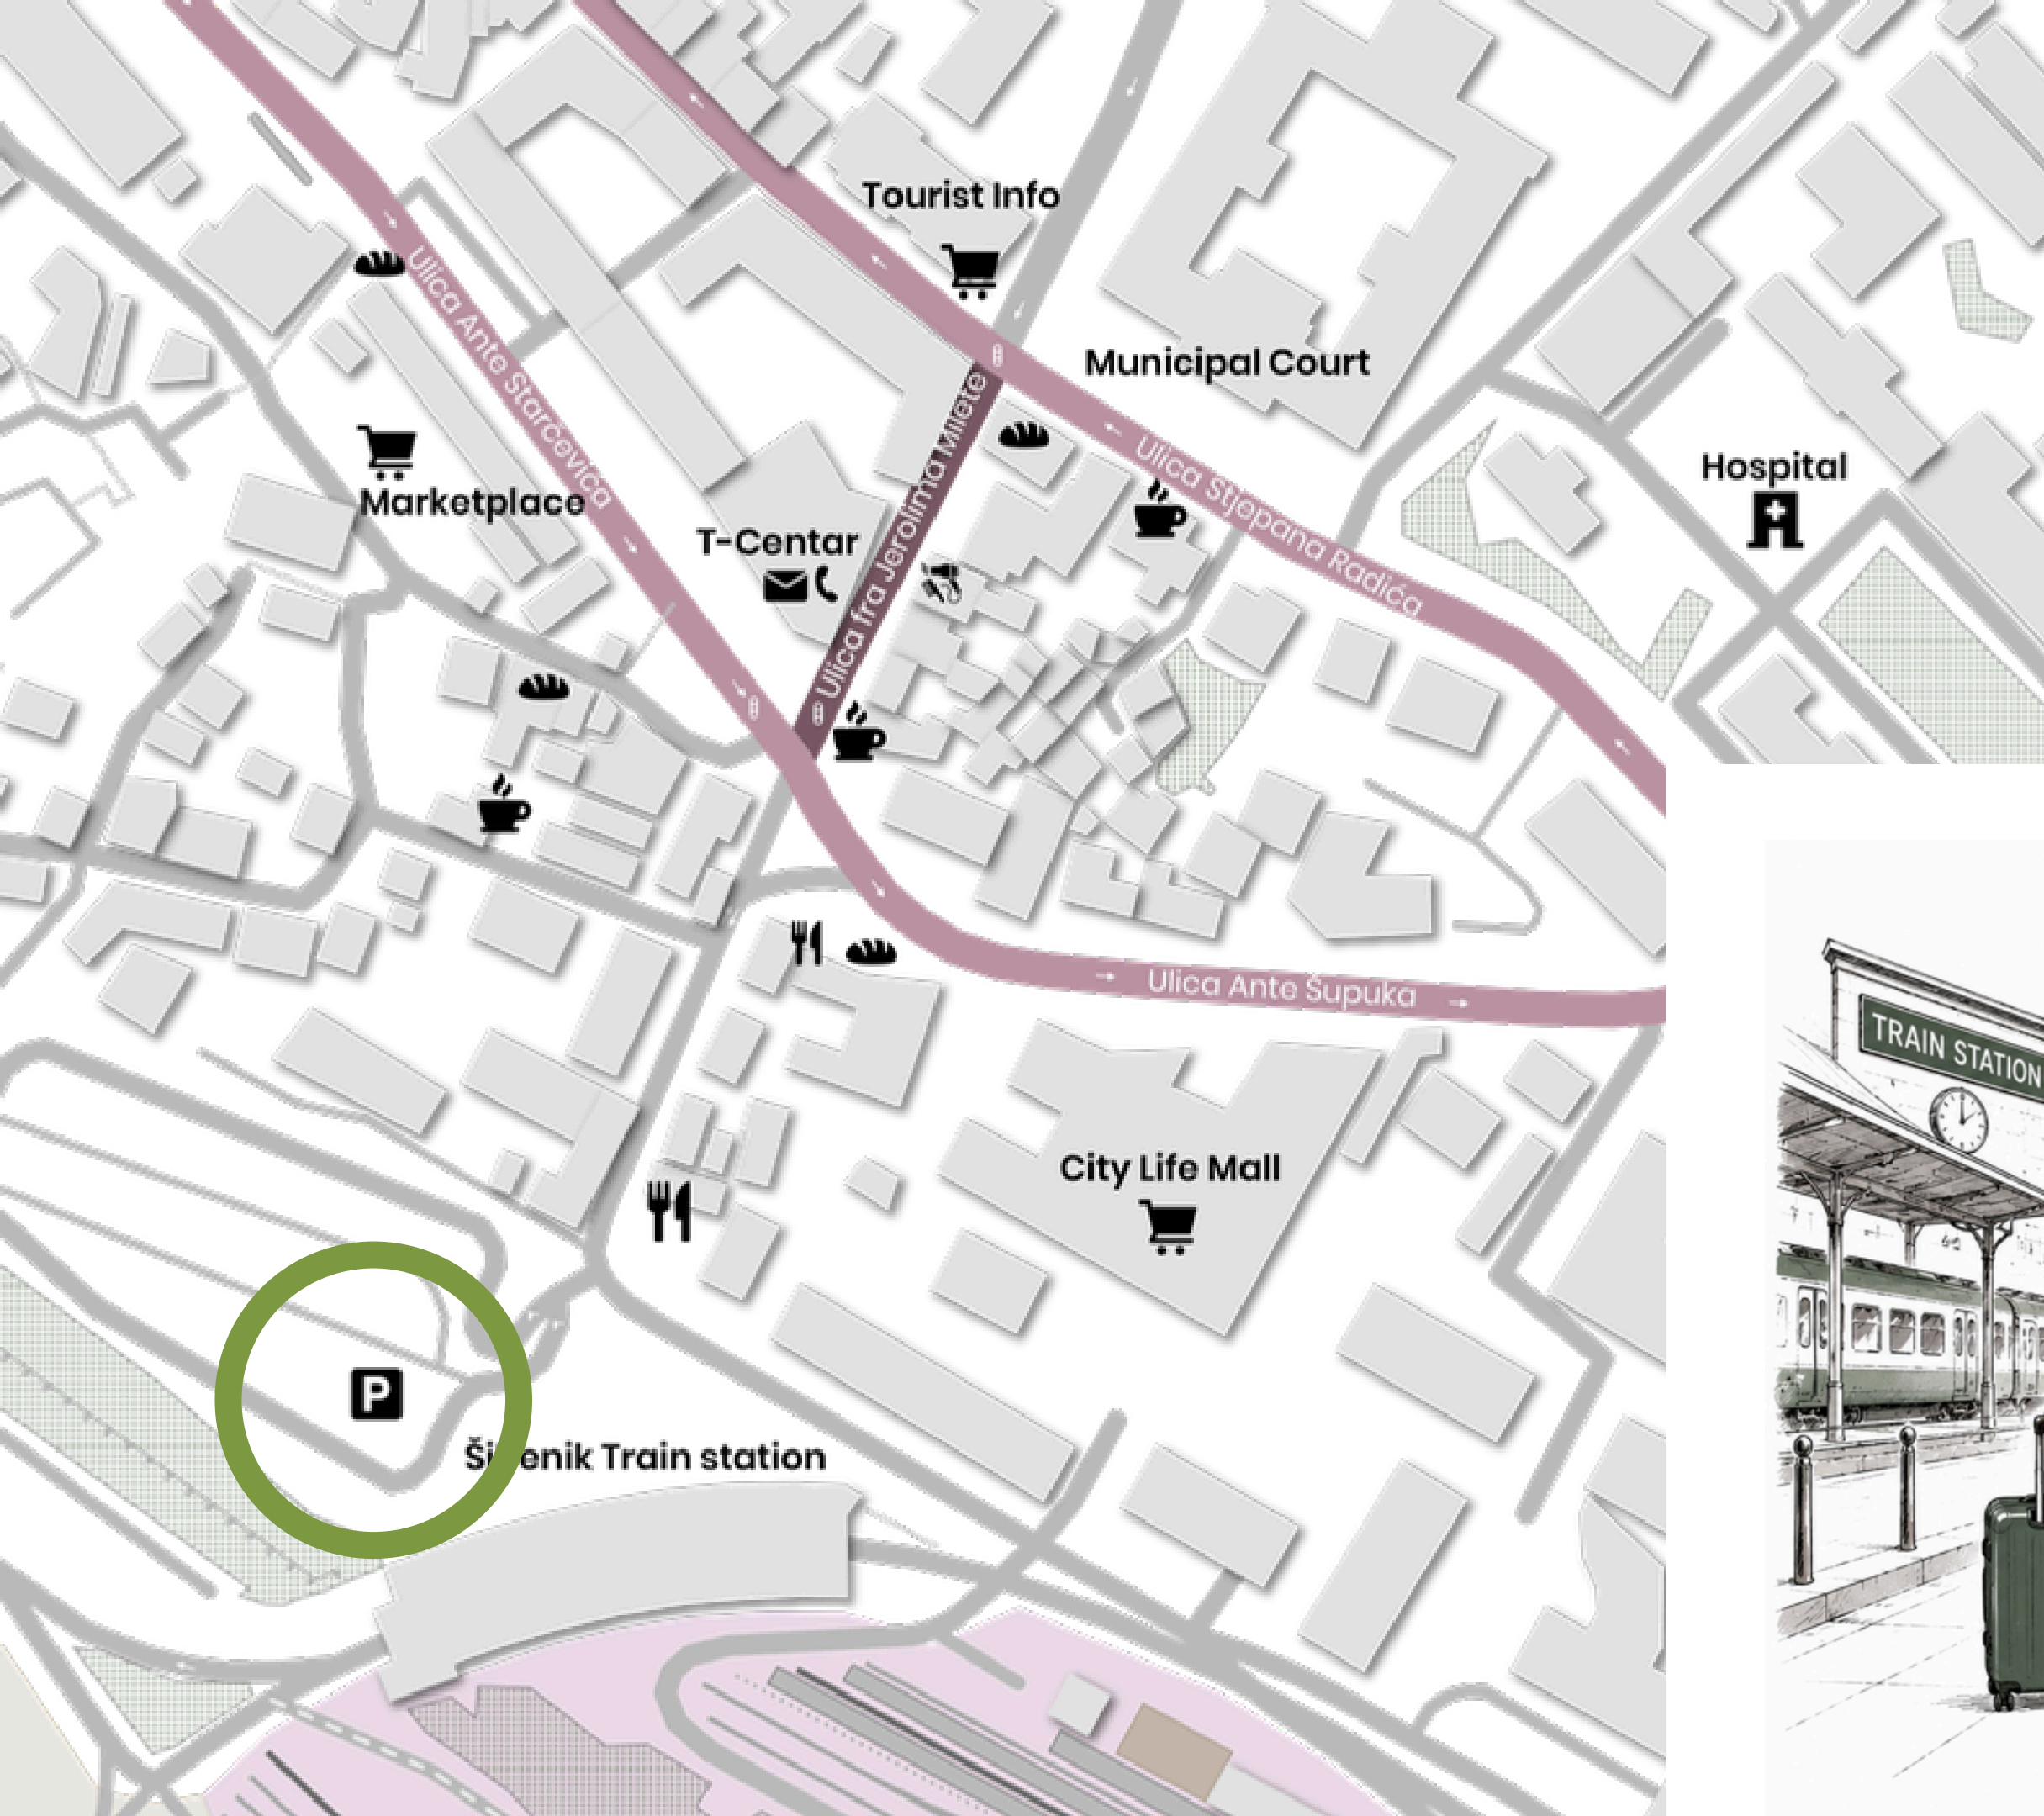

St. fra. Jerolima Milete

Grandma Ankica went to
her **cardiologist** to get a
prescription for her
medication.

Honza and Eliška and their kids travel from the train station to their apartment.

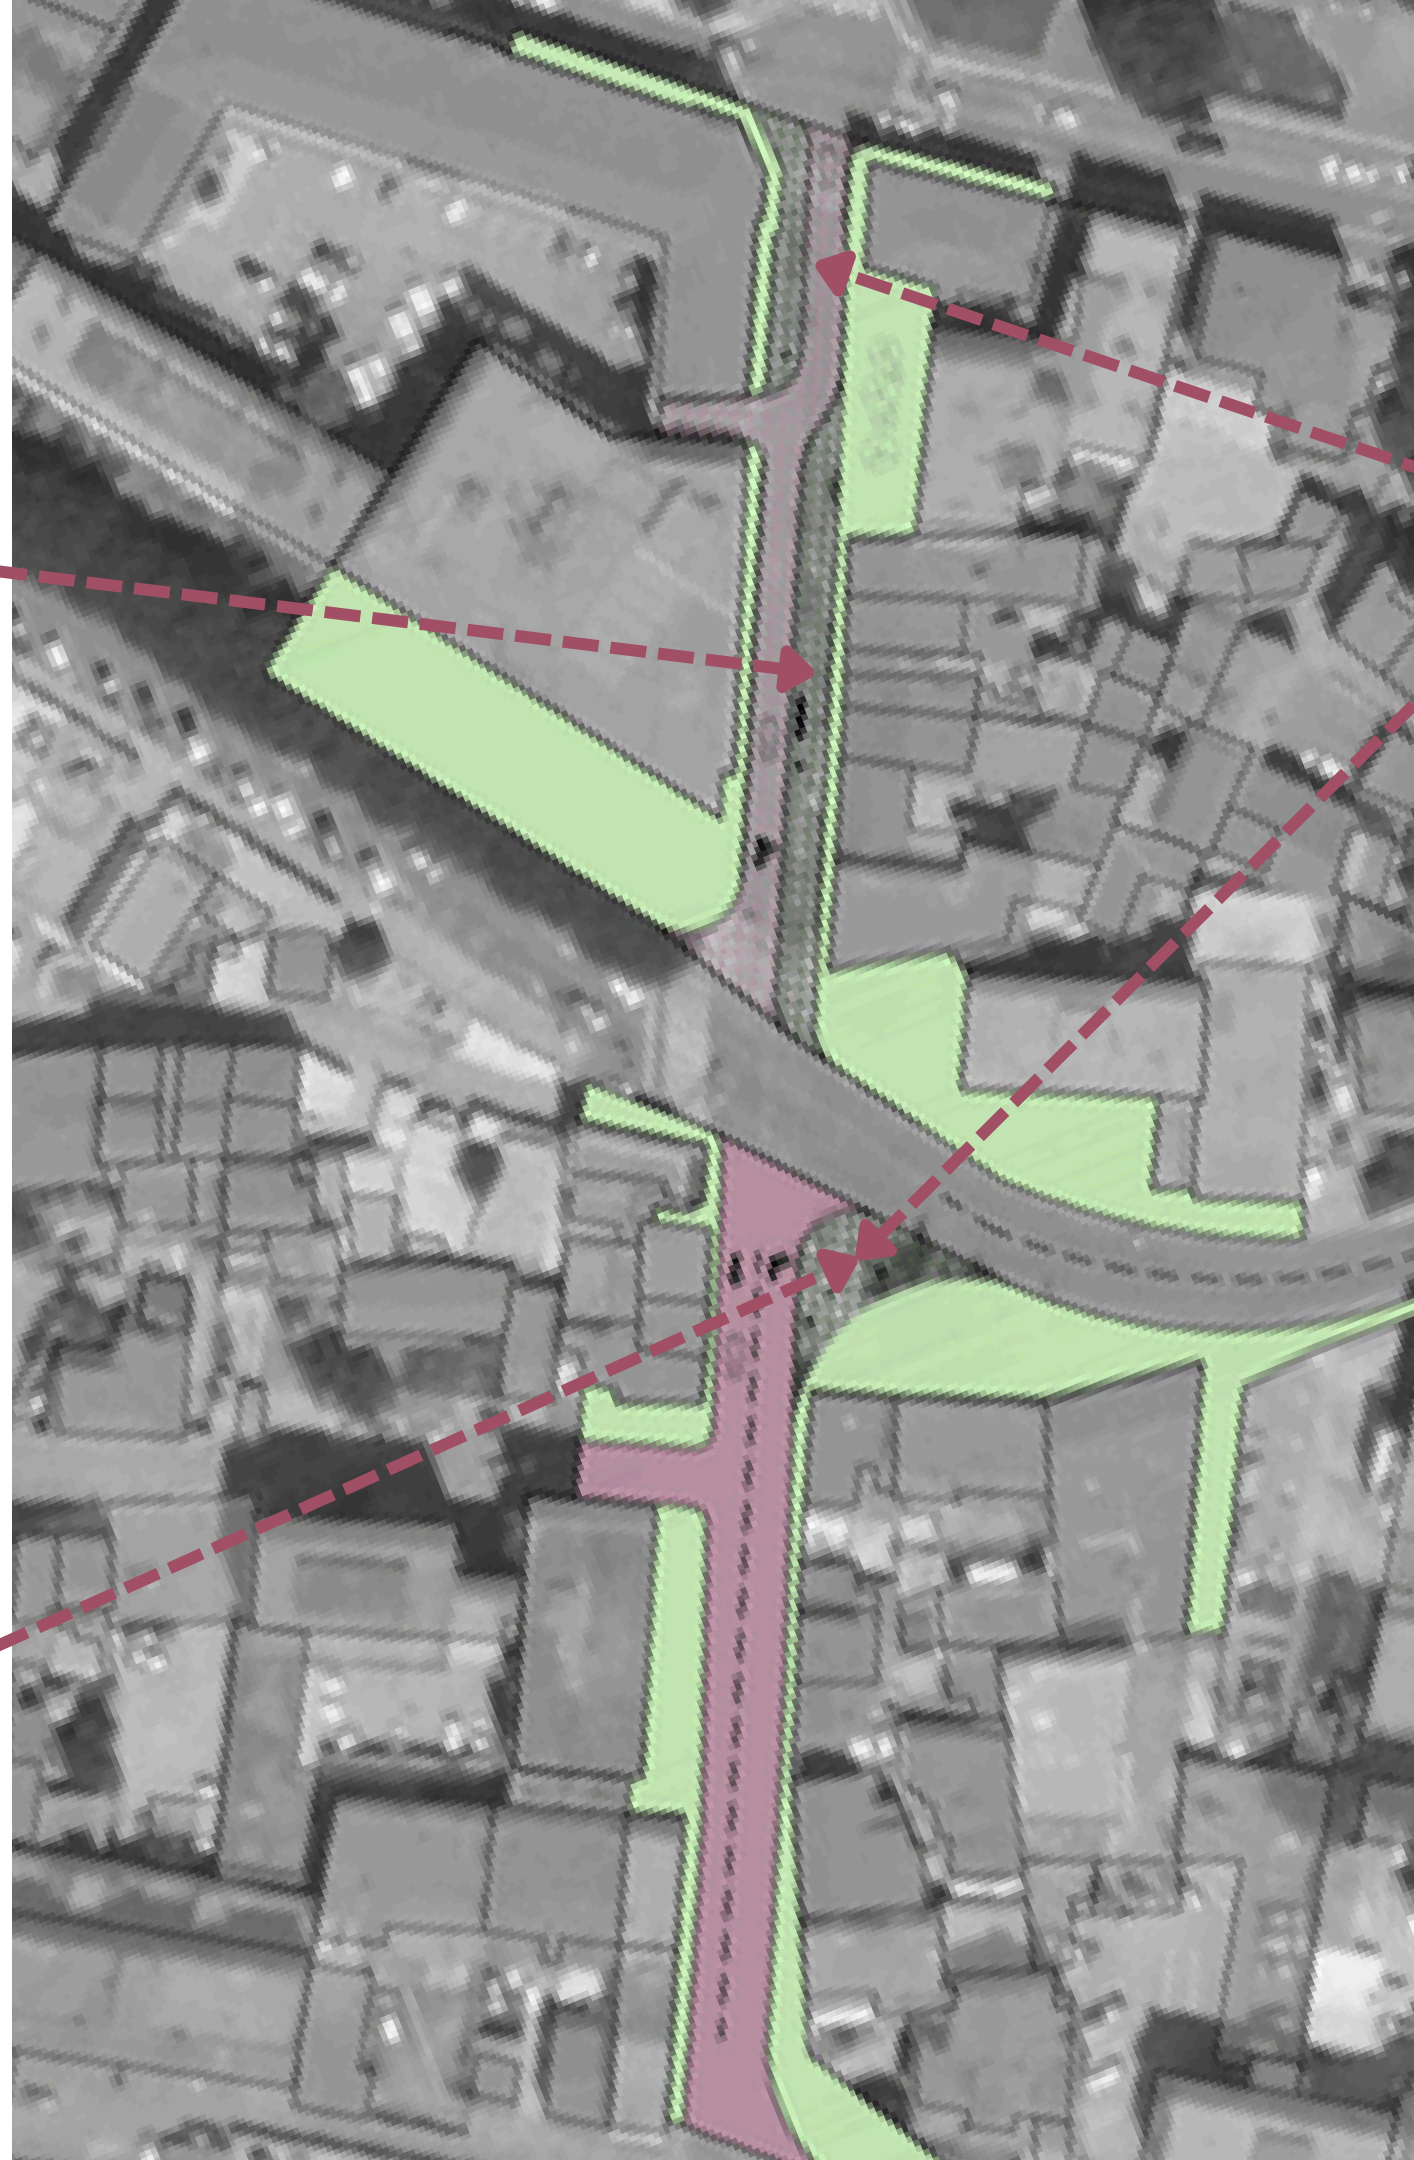

A young man, **Šime**,
is eating burek from
the nearest **bakery**.

Transitional^o period

St. fra. Jerolima Milete

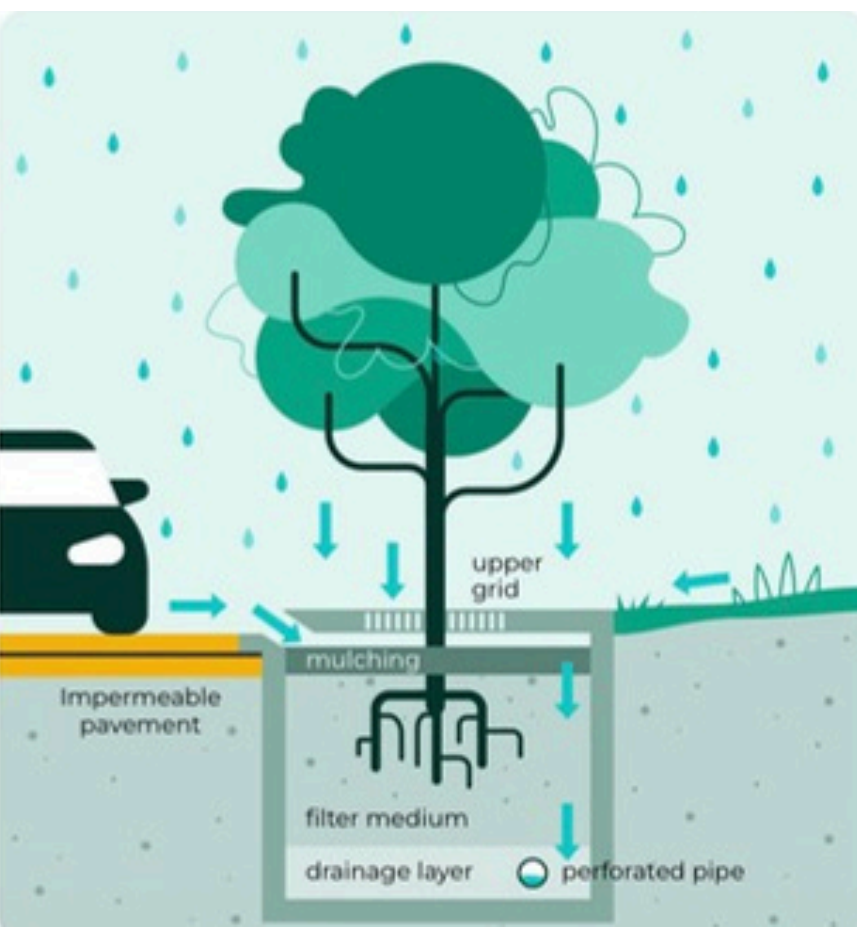

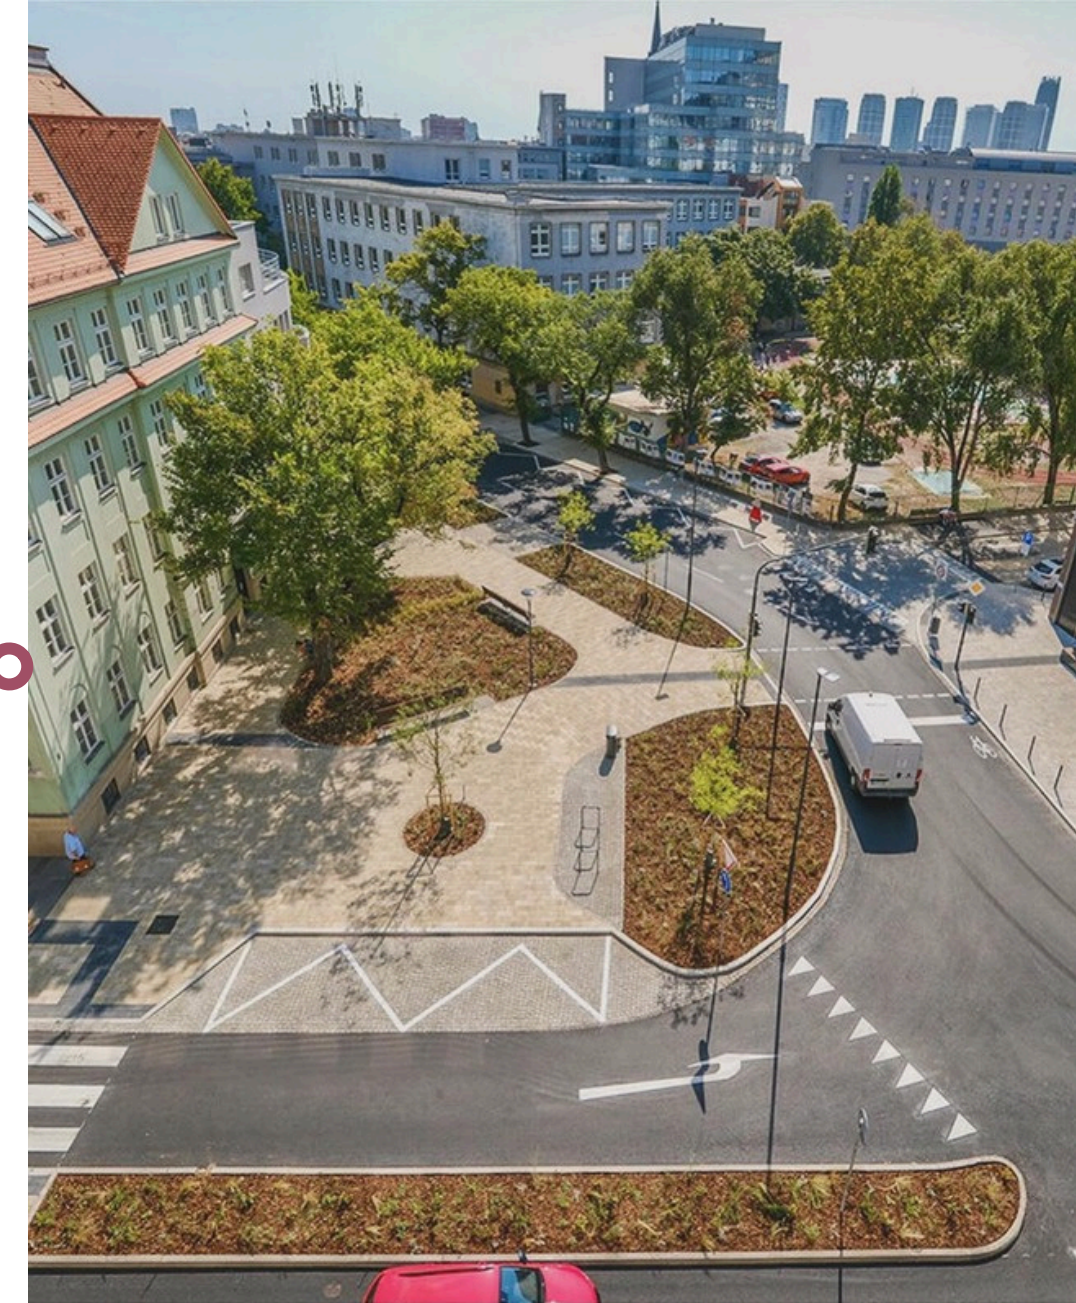

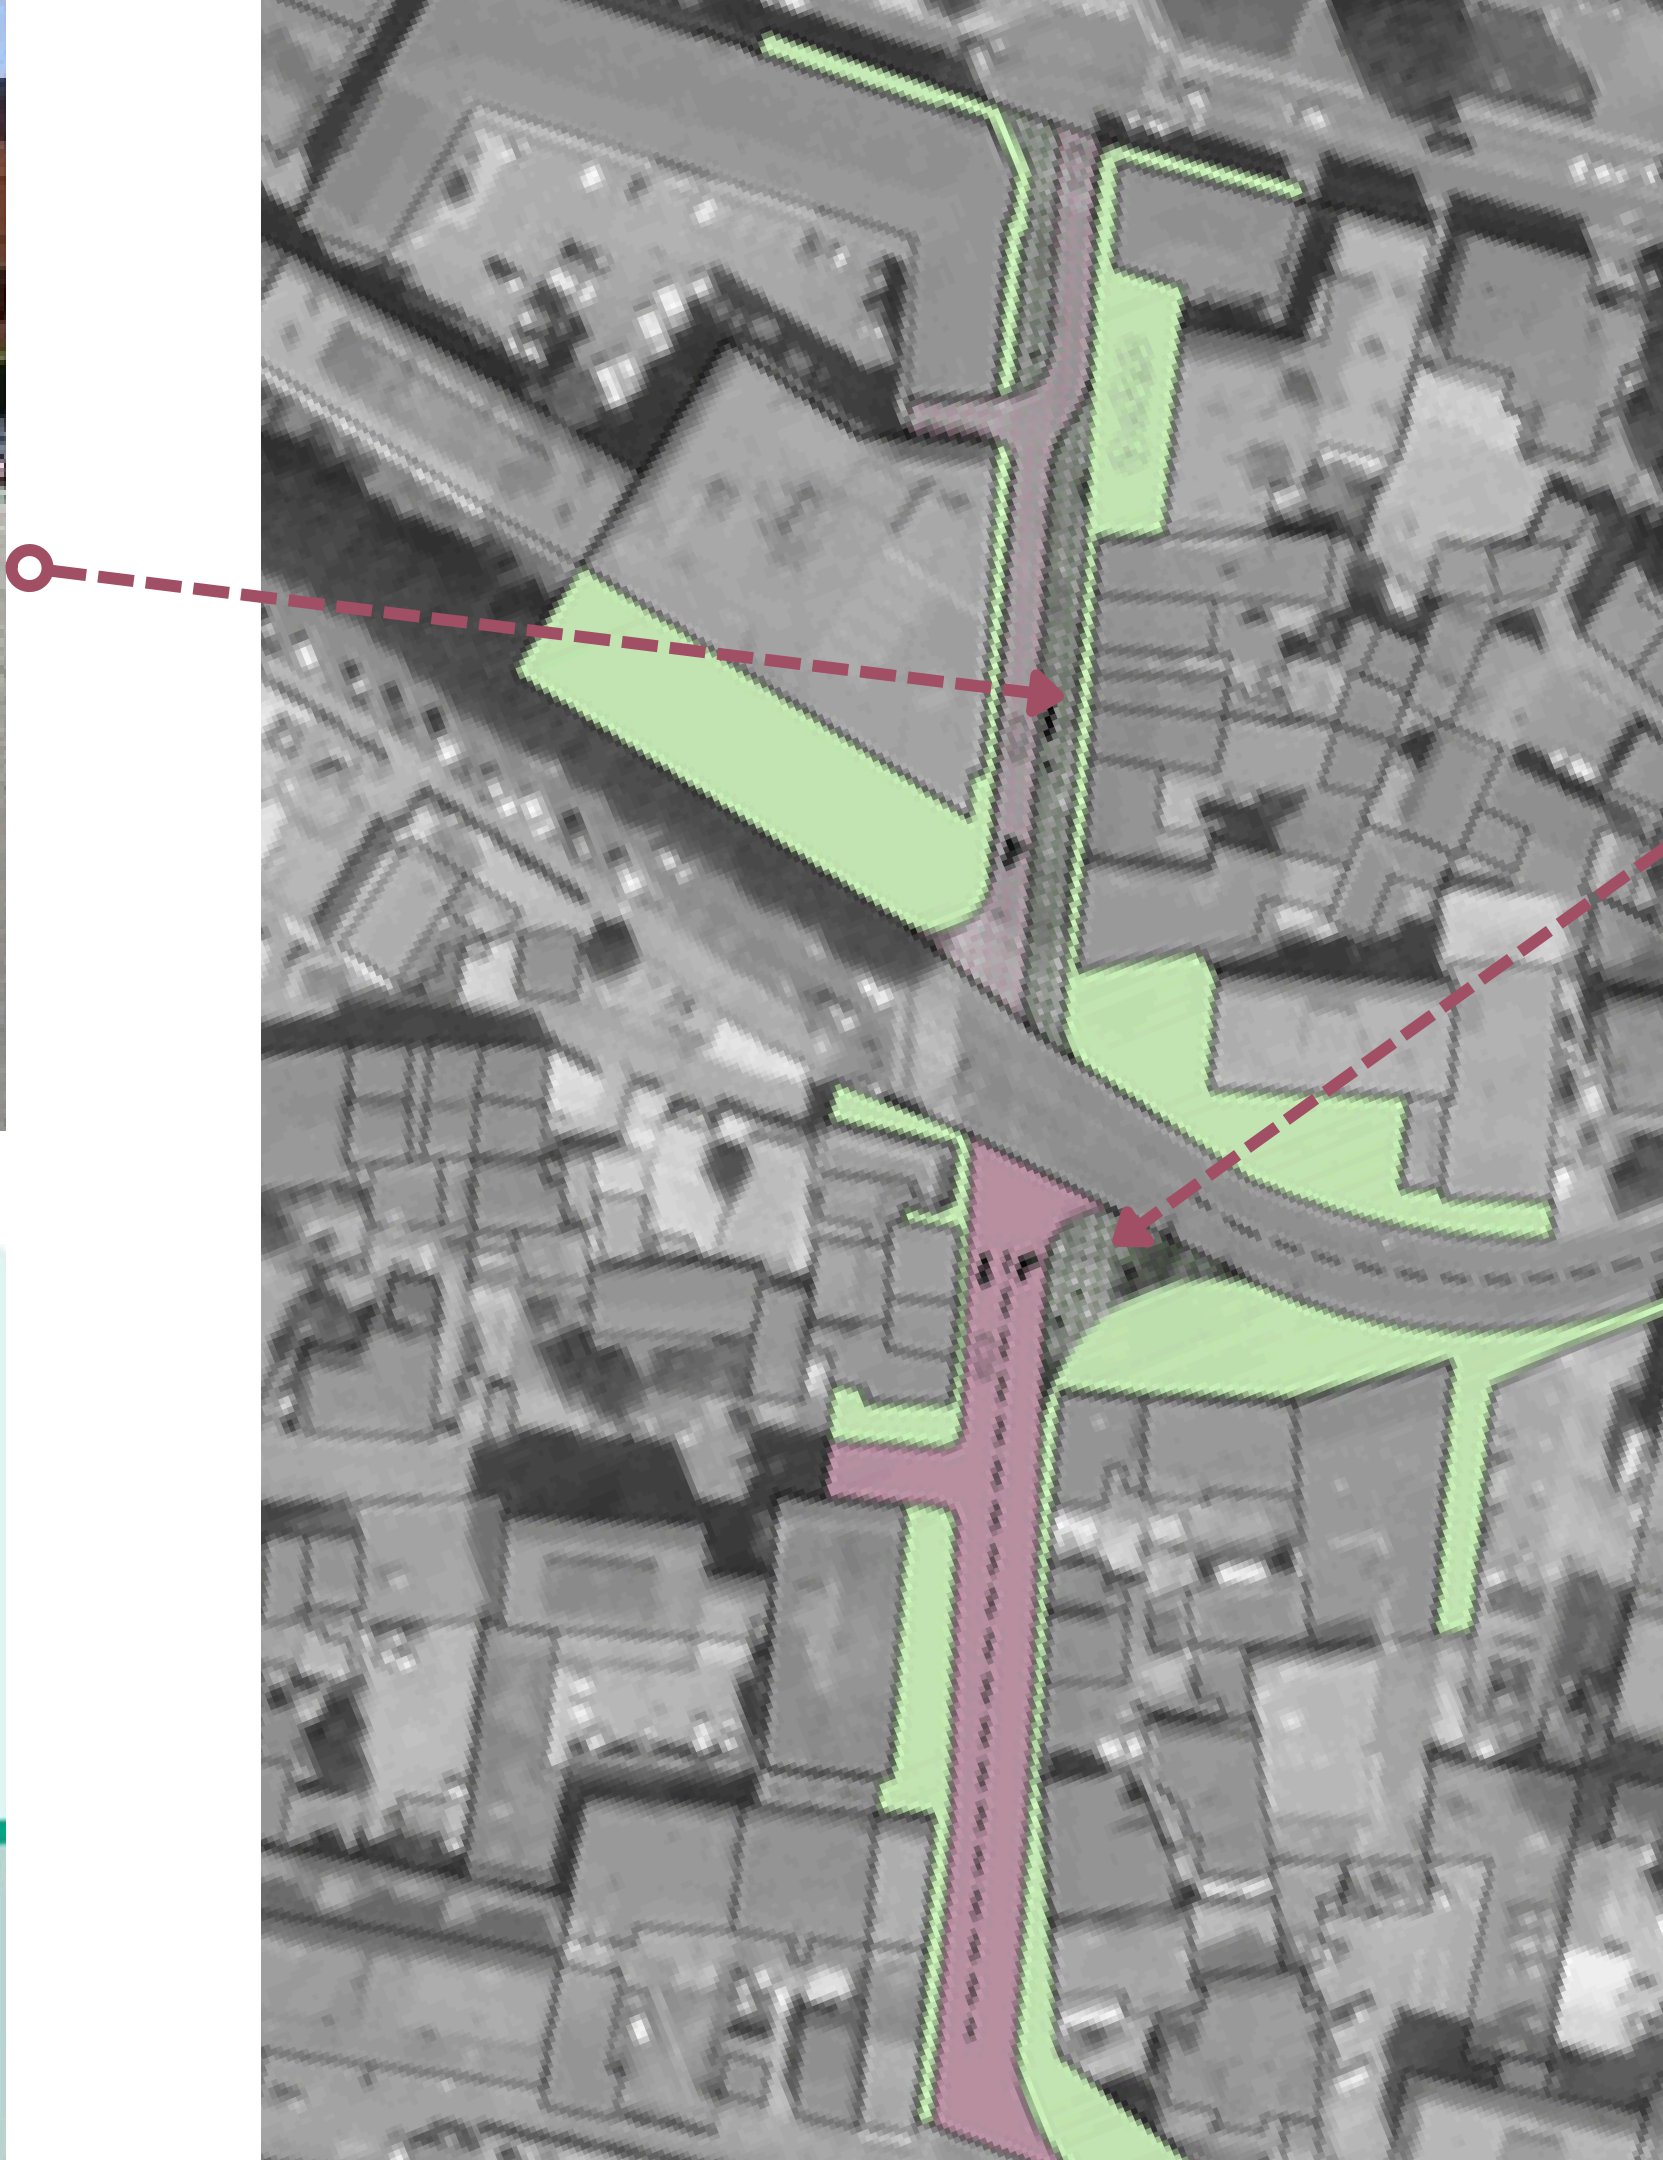

single-lane road for cars chicane
two-way road for bicycles
more walking space
more seating area (parklets)
more greenery
more lighting fixtures
more trash cans

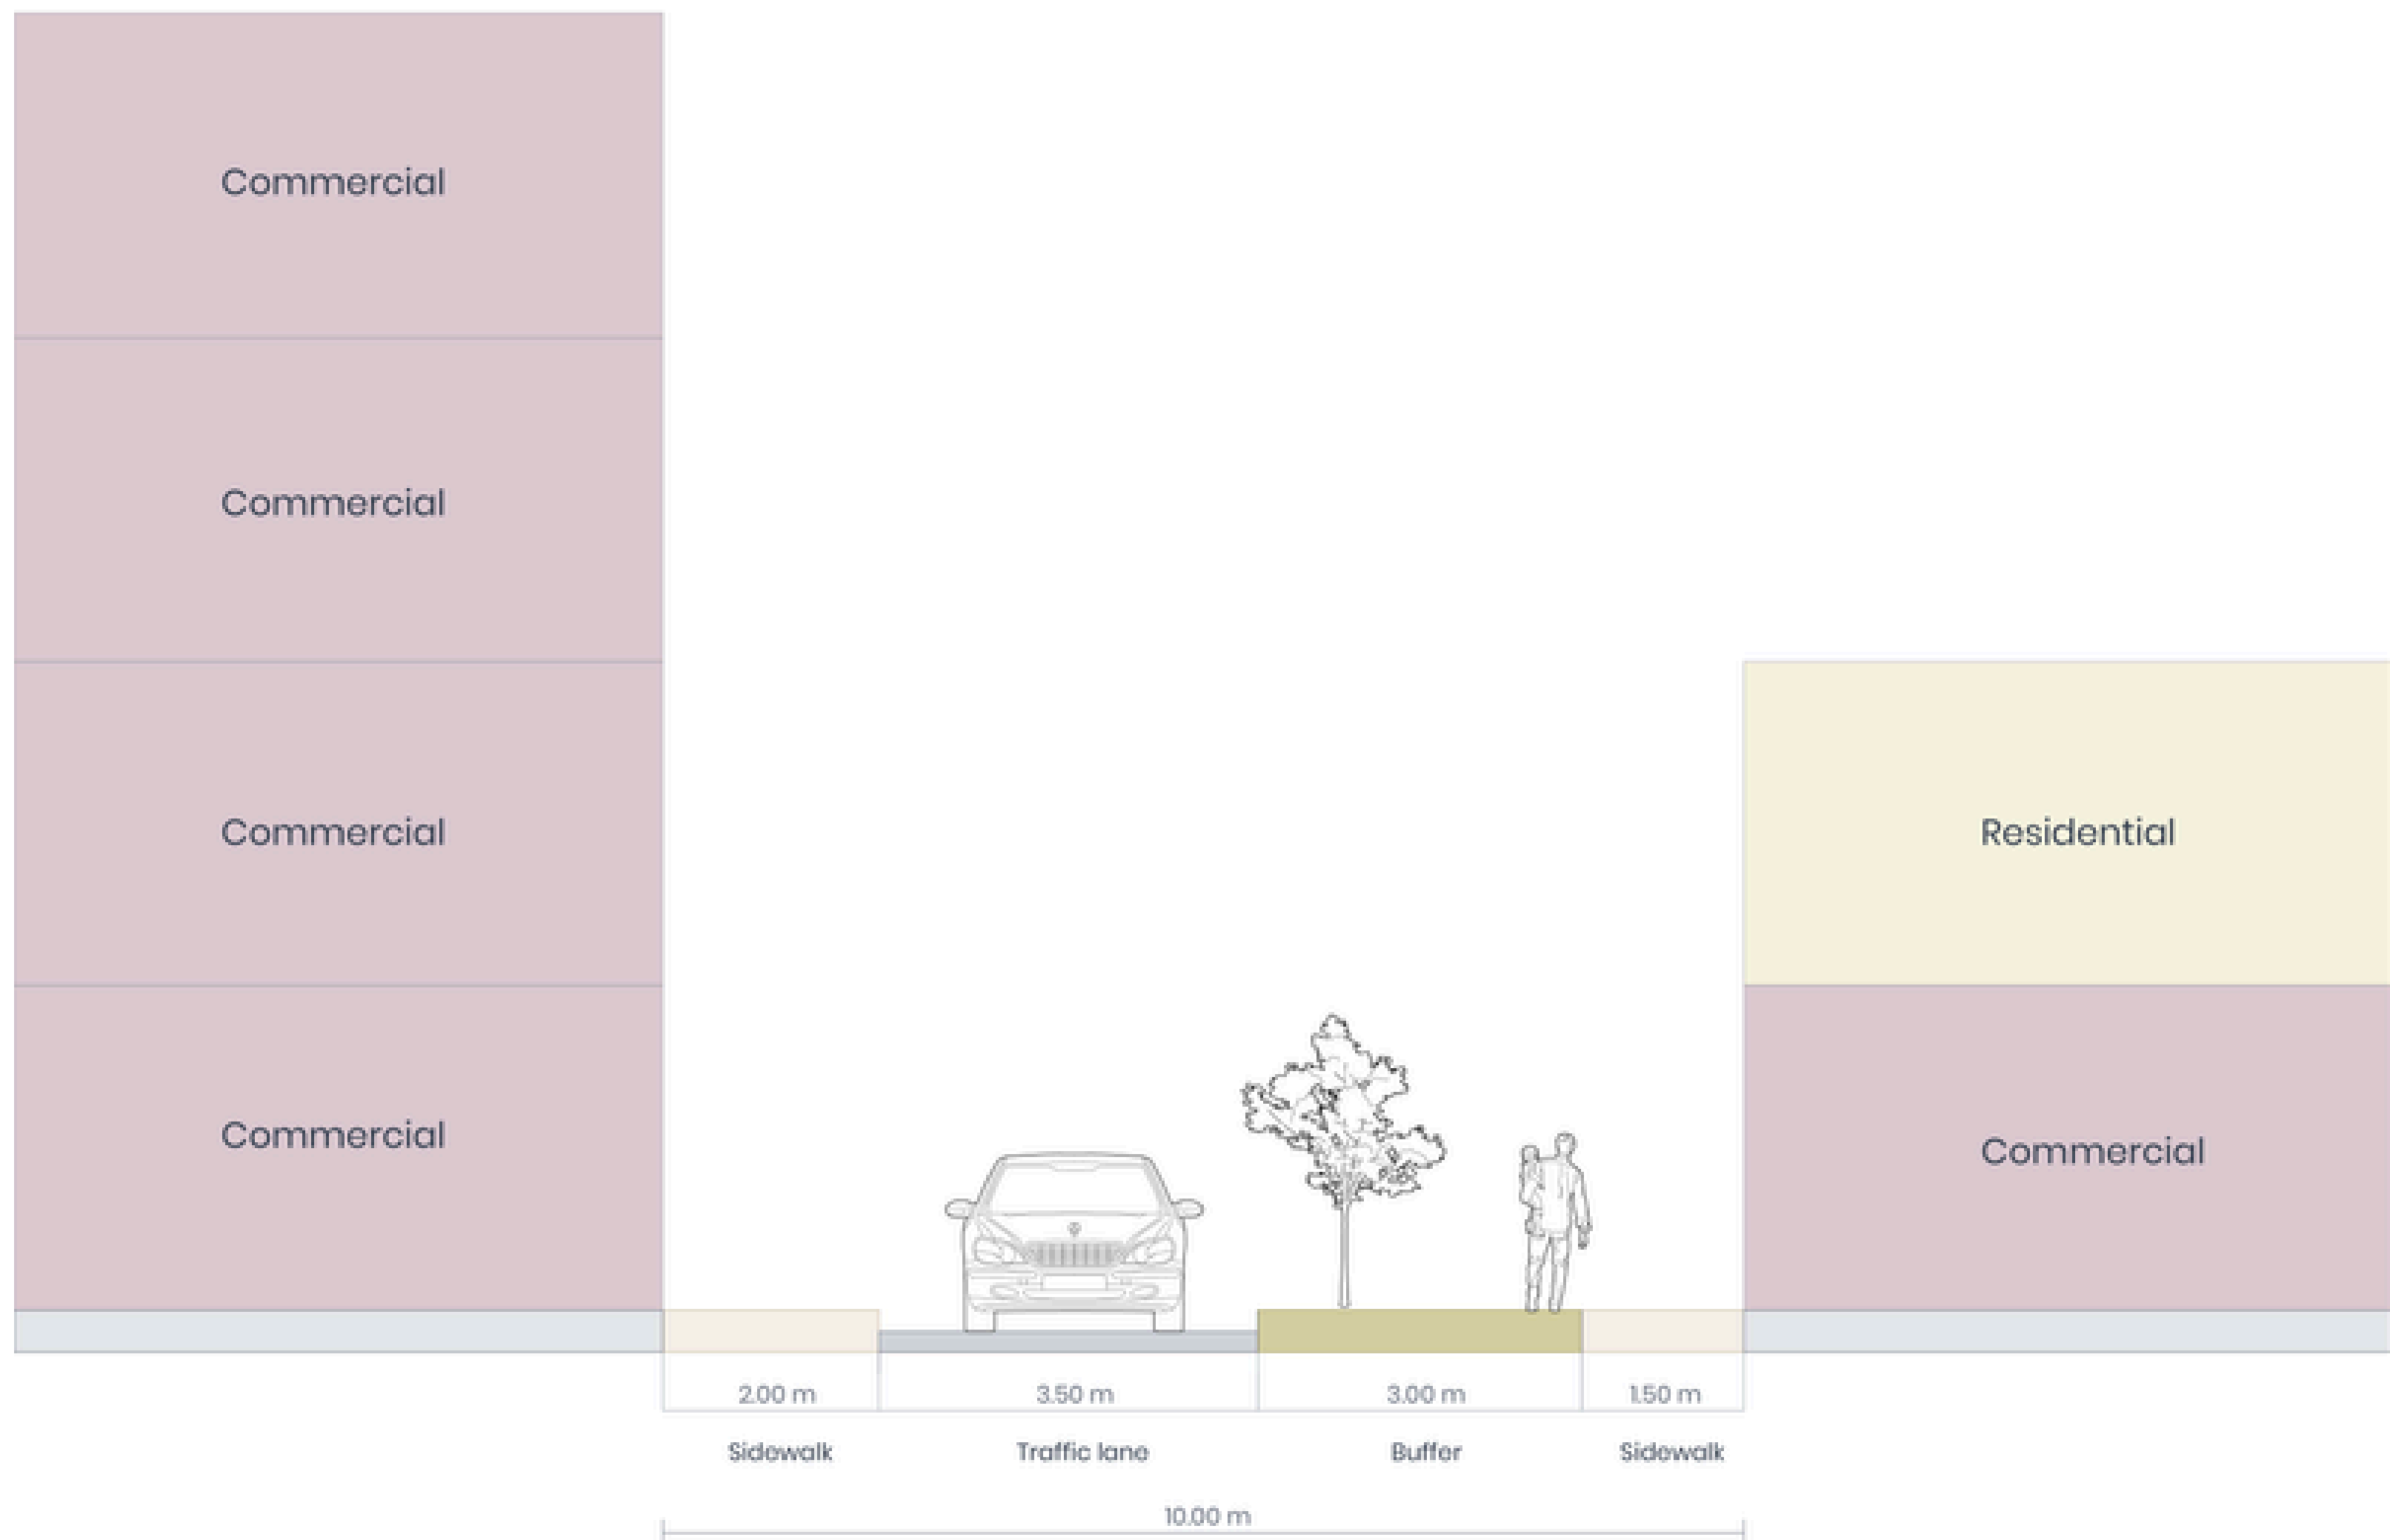

Proposed ° design

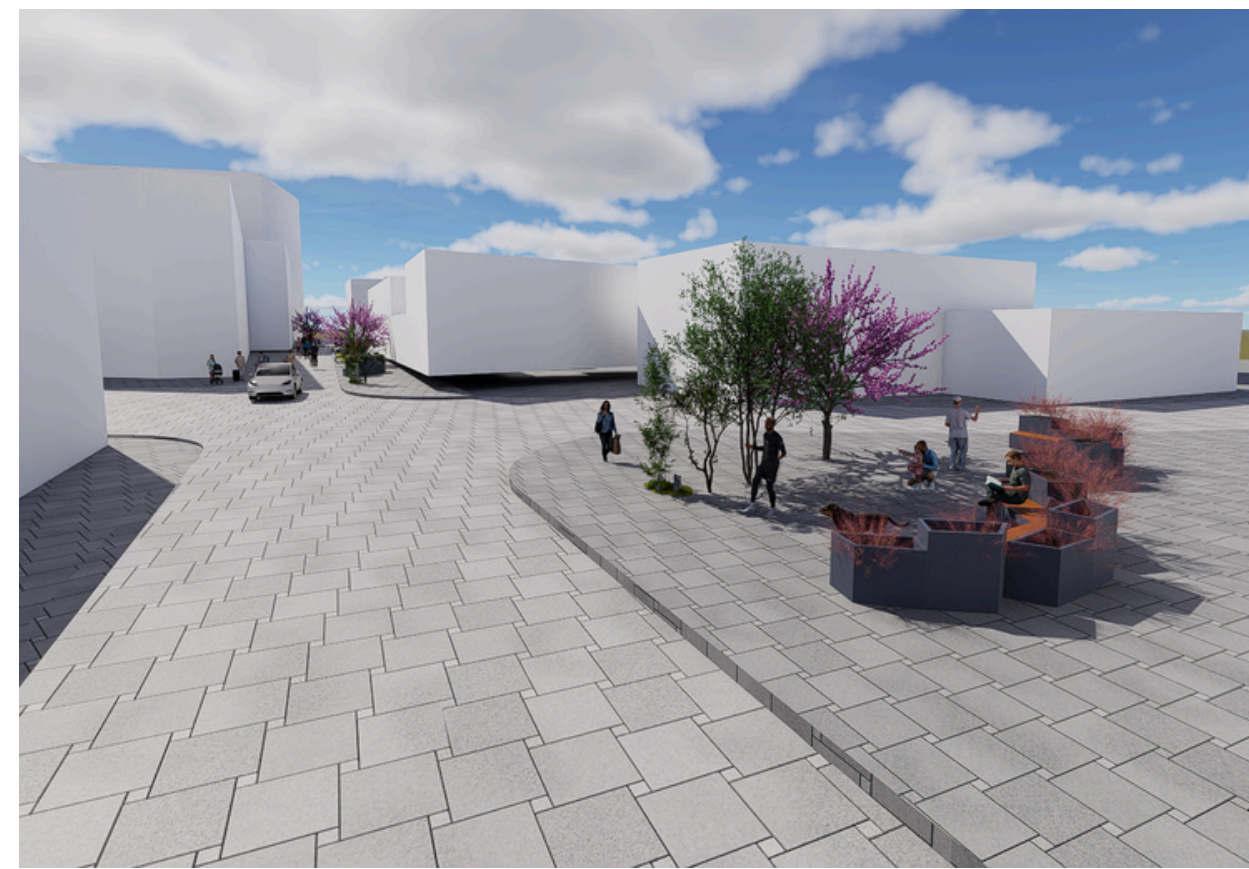

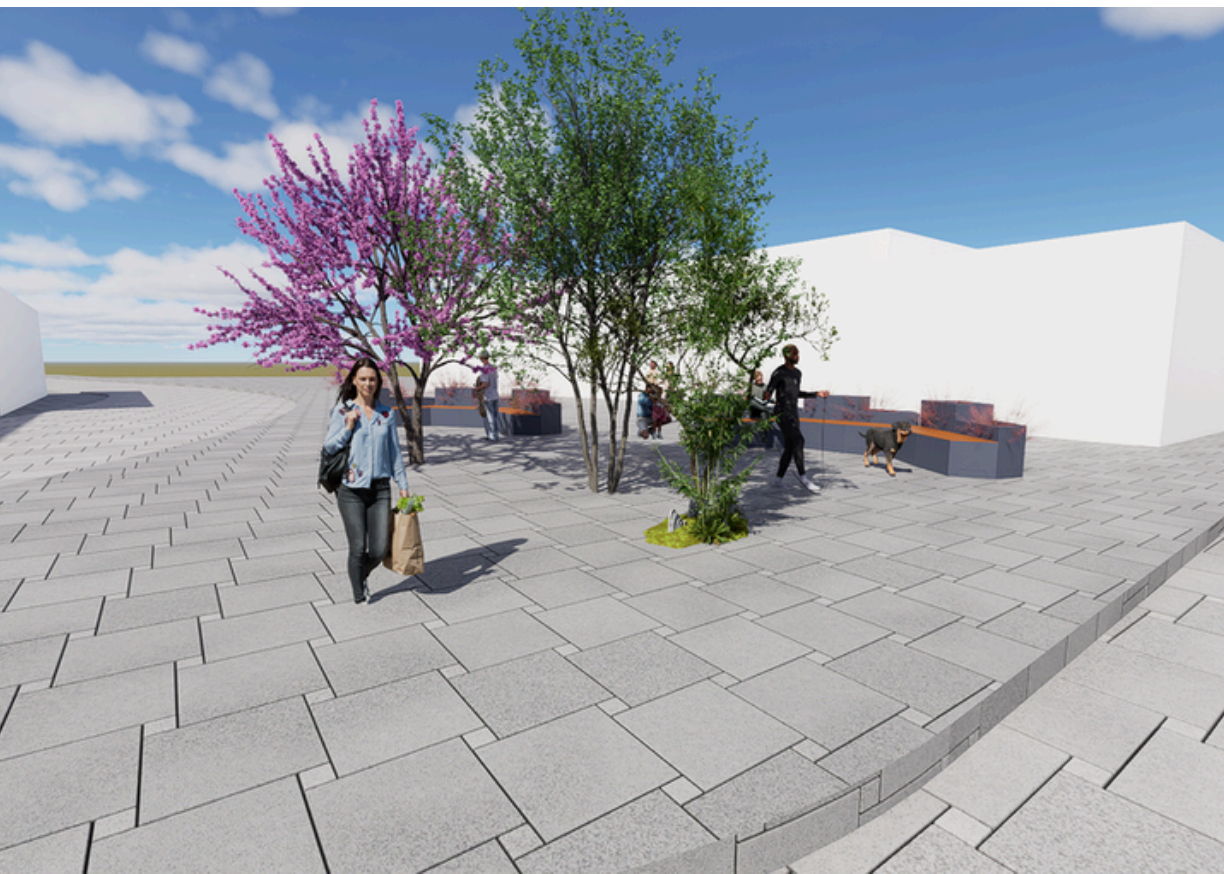

St. fra. Jerolima Milete

**shared street
tree boxes (NBS)
permeable paving**

Conclusion^o

- ✓ Safer streets for everyone.
- ✓ More space for people, less for cars.
- ✓ More greenery, interaction, and active public life.
- ✓ Encouraged use of micromobility.
